More paper. Better paper. Less steam

Solutions from pulp mill to paper machines

For over 60 years, Forbes Marshall has been working with the steam using industries to ensure optimum use of energy for paper machines.

The design and supply of Blow through steam and condensate systems, ensures complete condensate evacuation. These systems along with our range of Rotary Joints and Syphons, ensure **LESS STEAM** usage.

Improved surface temperature due to full removal of condensate also helps you make **MORE PAPER**.

In addition, our range of QCS systems and Hood systems, ensure **BETTER PAPER**.
