

COMPANY PROFILE

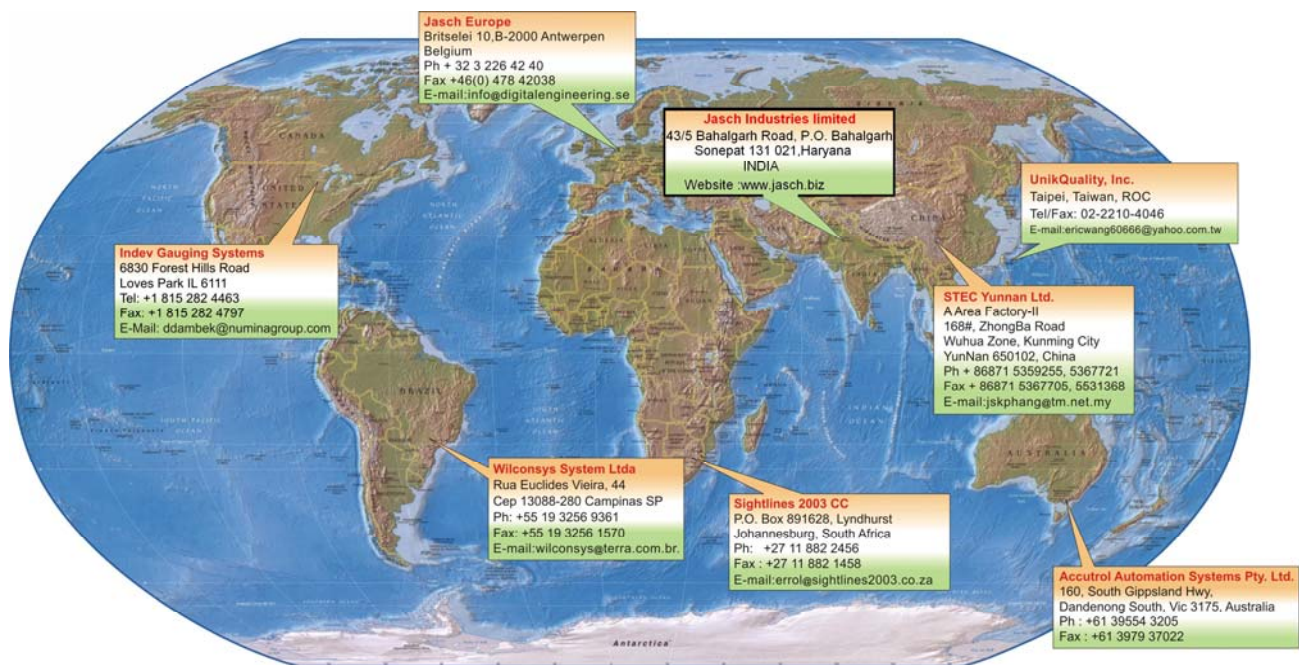

JASCH develops and build online measurement and control systems for paper, plastic films, metal strips, aluminium foil and metal coatings. We are leading supplier for these products with more than 350 installations worldwide and will continue to extend that lead by delivering compelling business solutions, business focused hardware and software products, robust service and support and all cost effective solutions.

For paper industry, our QCS systems are widely used to measure and control basic quality parameters of paper like **Basis Weight, Moisture, Ash and Caliper**. We are striving hard to offer technically advanced & most competitive products to become one of the major suppliers of QCS in the world.

Mission Statement: Quest for constant quality improvement leading to excellence.

Customers: We Exist and Excel due to our customers and they are our marketing front. Repeat confidence in terms of their order/recommendations in our marketing success.

Global Presence: Our Sales/Service Network
