

## Thermax Brief Profile

Thermax is one of the few companies in the world that offer integrated solutions in Energy and Environment Management. With its broad spectrum engineering expertise in heating, cooling, power, water and waste management and chemicals, Thermax enables corporates to be energy efficient and at the same time, environment-friendly. Thus contributing to industry's bottomline and the growing global effort towards sustainable development.

Thermax's Chemical & Water group for the past 4 decades has been providing Industries, Municipalities and Commercial & Residential segments with total water management solutions. Our 'One Stop Shop ' offers complete technology offerings for water and waste water treatment equipments, Ion Exchange resins, Performance chemicals, spares and value added services like AMC, O&M, Spares, Plant Audit, Augmentation, Revamp/retrofit etc.

Our range of offerings include:

**Water treatment** : Pre-treatment of water, treatment of water for boiler feed & cooling towers, water treatment for process application, treatment of water for domestic use, drinking water systems,

**Waste water treatment:** Industrial effluent treatment, sewage treatment, water recycling, hazardous waste management.

**Ion Exchange Resins:** Manufacturers of Ion exchange resins for various applications in Water Treatment as well as specialty applications

**Performance Chemicals:** Cooling water treatment, Boiler water treatment, Reverse osmosis chemicals, Polyelectrolyte, Paper Chemicals

For bringing superior value to its solutions portfolio, the business has formed partnerships with global technology leaders like GE Water & Process Technologies for sewage treatment based on Membrane Bio Reactor(MBR) and Wehrle Umwelt GmbH for difficult to degrade industrial effluents. We also have a tie-up with Georgia Pacific for Paper chemicals.

Till date, this business group has designed, engineered, supplied, erected, tested and commissioned more than 10,000 plants.

Thermax operations spans across the globe with export of resins & water treatment equipments to more than 40 countries.

Thermax has got the largest network in India for sales & service of Water & Waste Water treatment equipments and Chemicals in India.
